Hi GitHub User revalew

We came across your GitHub project CVaPR-Project, which implements a Convolutional Neural Network for classifying tumor data and metastasis. Your technical approach using hyperparameter optimization with the optuna library and various feature selection methods caught our attention. We would like to invite you to showcase this work in the Computer Vision Projects Expo 2024 competition hosted by Ready Tensor, Inc.

CV Projects Expo Competition Details:

- Focus on Computer Vision techniques and applications
- Free to participate as an individual or as a team
- Submit write-up of your existing computer vision project (no new work required!)
- Easy submission process, typically completed in under 1 hour
- Submission Deadline: December 30, 2024

Prizes include cash awards, certificates, featured placement on the platform, and social media coverage.

For more information, visit: <https://www.readytensor.ai/cv-expo-2024/>

This is a truly global competition with participation from over 30 countries across North America, Europe, Asia, Africa and beyond. Don't miss this unique opportunity to showcase your existing computer vision project alongside leading professionals from around the world - no additional work required!

We look forward to your participation.

Best regards,

Rahul P.
